

ECR Reopening Survey

In early May 2021 the Board sent out a survey to ECR members to ask what they would be comfortable doing when dancing reopens. The survey responses are shown below.

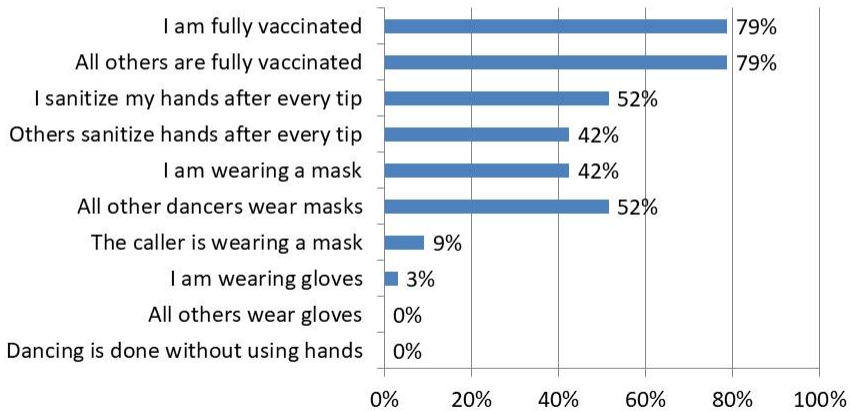

When do you expect to be fully vaccinated?
(Fully vaccinated means 2 weeks after your second shot)

(35 responses)

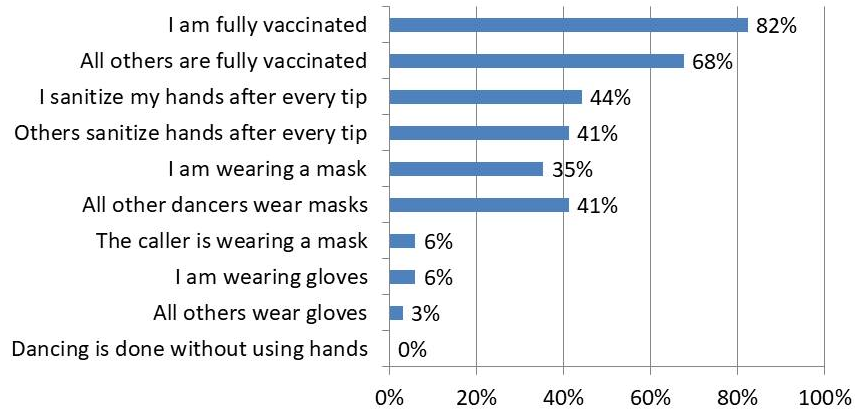

Which of the following must occur for me to feel comfortable dancing INDOORS (with doors open, and fans running) with other members?

(33 responses)

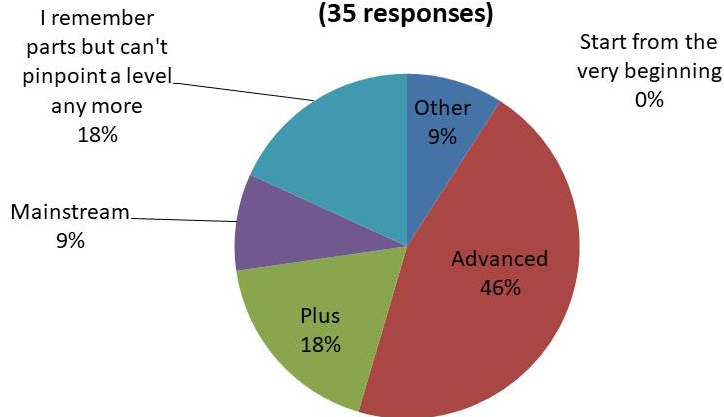

Which of the following must occur for me to feel comfortable dancing OUTDOORS with other members?

(34 responses)

At what level do you feel comfortable dancing to start?

(35 responses)

The most significant insights the Board gained are that all responding club members have been vaccinated or will be soon, and most want all other dancers to be vaccinated before returning to in-person dancing. Some considered masking and hand sanitizing/washing to be important but few wanted to wear gloves or require the caller to be masked.
